MICHAEL J. CARONE
SUPERVISORY PATENT EXAMINER

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the known prior art does not disclose or fairly teach an inflator comprising a hybrid multi-stage gas generator, the gas generator comprising: first and second pyrotechnic units; a chamber accommodating compressed gas; a gas outlet aperture located in a flow path from the chamber containing the compressed gas to the exterior of the inflator, the gas outlet aperture having an initial cross-section to define an initial gas flow area, the gas outlet aperture incorporating a deformable part configured to deform in response to a predetermined gas pressure within the chamber so as to increase the cross-section of the gas outlet aperture and thereby increase the gas flow area of the gas outlet. There is insufficient motivation to modify O'Loughlin et al.'s (US 5,794,973) rupture disk 102 and aperture 60 arrangement with the flap/ tab elements 5 of Schnowitz et al. (US 6,467,805), absent the use of impermissible hindsight reconstruction. O'Loughlin et al. dual state hybrid inflator works perfectly well without making any modification to the rupture disk 102 and aperture 60 arrangement. Similarly, the Dolling et al. (US 6,786,507) reference cannot be properly used to modify O'Loughlin et al. to arrive at the applicants' invention because Dolling et al. discloses a rupture membrane arrangement that does not define a gas outlet aperture with an initial cross-section defining an initial gas flow area before the membrane 22 ruptures.
2. This statement is not intended to necessarily state all the reasons for allowance or all the details why the claims are allowed and has not been written to specifically or impliedly state that all the reasons for allowance are set forth (MPEP 1302.14).

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James S. Bergin whose telephone number is 571-272-6872. The examiner can normally be reached on Monday - Wednesday and Friday, 8.30 - 5.30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Carone can be reached on 571-272-6873. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
